DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to show, a primary actuator operable associated with a support structure having a first and second arm portions driven relative to one another in response to an electrical activation of the primary actuator, and a secondary actuator operable associated with each secondary portion for driving each portion between an opened position and a closed position in response to an electrical activation of the secondary actuator, each of the actuators being operable independently of one another wherein, at least one of the primary and secondary actuators operates through and actuator –movement – amplification portion of the support structure. Prior art also fails to show, the primary and secondary actuators triggered in different sequential series for bi-directional operation. Prior art also fails to show, the method of energizing at least one secondary actuator for moving the first and the second pivotable arm portions integrally formed with the support structure and sequentially energizing and de-energizing the primary and secondary actuators and opening a first valve responsive to energization of a first secondary actuator, while a normally closed second valve remains closed in response to a de-energized second actuator and expanding a positive displacement pumping chamber responsive to energization of the primary actuator to draw fluid through the first valve into a the chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
